

New Managing Director

Hannes Pils has been appointed Managing Director of TIG

Rankweil, Austria – September 2019

Mr. Hannes Pils has been appointed Managing Director of TIG with effect as of 9/16/2019.

During his studies of business informatics at the Johannes Kepler University in Linz, Mr. Pils gained his first professional experience as a freelancer in the IT sector. In the years that followed, he was responsible for international product and portfolio management as IT Manager at voestalpine group IT. Most recently, Mr. Pils was Head of the Software Business Unit at LiSEC and Managing Director of LiSEC Automation Middle East, where he was responsible for digitalization and sales activities.

The leaving Managing Director, Mr. Wolfgang Frohner, will support Mr. Pils in his remaining time until 3/31/2020 to ensure a smooth handover of all management responsibilities.

“After more than 25 extremely exciting years at TIG, with many valuable experiences, and great joy in the development of a successful, modern company, but also in the friendships I made, I have decided to take up a new challenge.

I am convinced that you will find Mr. Pils to be an innovative and highly customer-oriented new contact, and I would ask you to place the same trust in him as I enjoyed from you.“

Wolfgang Frohner

TIG – Technische Informationssysteme GmbH

TIG develops and sells Manufacturing Execution Systems (MES) worldwide and has

- connected more than 10,000 injection moulding machines worldwide,
- 7 of the top 10 automotive suppliers as customers.

Founded more than 25 years ago as a specialist for production machine networking, TIG is now the industry leader in quality assurance and production optimization. TIG distributes and maintains its product portfolio globally via locations in Rankweil, Schwertberg and Vienna (Austria), as well as York (USA), Shenzhen (China). More than 350 customers and numerous big-name manufacturers of injection moulding, rubber or recycling machines rely on the state-of-art MES solution by TIG.
